**AMERICAN PILLAR** (H. M.)—A single flowering variety of great beauty. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and clusters of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten.

**CHAPLIN'S PINK CLIMBER**—A very important addition to the list of hardy climbers. Rose experts pronounce it to be the best hardy climber introduced in many years. Its popularity is already assured. Large flowers of a clear lively pink borne on large trusses.

**CLIMBING AMERICAN BEAUTY** (H. W.)—Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty.

**CLIMBING WHITE AMERICAN BEAUTY** (H. W.)—A hardy disease-resistant variety; vigorous growth and great freedom of bloom. It is much more double than Silver Moon, with but one flower to a stem. Has excellent keeping qualities.

**CRIMSON RAMBLER** (C. P.)—Bright crimson flowers produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches; also makes a fine attractive hedge.

**DOROTHY PERKINS** (H. W.)—A most beautiful deep pink; the flowers are borne in large clusters of small double blooms and are very sweetly scented, quite first class.

**DR. HUEY** (H. W.)—Bud medium size; semi-double; borne in clusters of 3 or 4 on good stems; lasting. Color, dark crimson-maroon, of great brilliancy; stamens and anthers light yellow. Blooms continuously for three weeks.

**DR. W. VAN FLEET** (H. W.)—Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center.

**EMILY GRAY** (H. W.)—A new yellow climbing Rose with glossy, undulated holly-like foliage. The buds are long and flowers of golden yellow are large and semi-double. A valuable acquisition. Needs winter protection north of Washington, D. C.

**EUGENE JACQUET**—The earliest and most profuse flowering of all the climbers and of the easiest cultivation. Almost every eye produces a handsome truss of fragrance, cherry-red flowers. Eugene Jacquet can be bloomed in February without difficulty. It flowers a week earlier than Tausendschoen or Rosarie under the same conditions and carries handsome, dark green, mildew resisting foliage. It holds the flowers unusually long—the color improves with age. Eugene Jacquet should be forced so as to show color ten days before Easter to be at its best for Easter sales.

**GARDENIA** (H. W.)—Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

**HIAWATHA** (H. W.)—Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color, it is brilliant ruby-carmine, with a clear white eye and a mass of golden stamens.

**JACOTTE** (H. W.)—Bud large, orange and yellow; flowers large, semi-double, open, cupped, very lasting; deep coppery yellow tinted coppery red; borne, several together, on long, strong stem; fragrant. Blooms profusely in May and in June.

**MARIE GOUCHAULT** (New)—A pink form of the well known forcing variety, Eugene Jacquet; dainty pure pink flowers in great abundance. A fine forcing climber.

**MARY LOVETT** (H. W.)—In this Dr. Van Fleet has brought out another Wichuraiana Hybrid, "White Dr. Van Fleet." This rose has done well and is strongly recommended. Loses foliage early.

**MARY WALLACE** (H. W.)—This is Dr. Van Fleet's masterpiece. Blooms two or three times during the summer months. A pillar rose supporting itself in a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at base of petals. The largest Hybrid Wichuraiana in existence. Seen this year in all its giant loveliness.

**PRIMROSE**—A new hardy yellow climber with large, double, canary-yellow flowers. Blooms very profusely.

## (OWN ROOT ROSES)

**MME. GREGOIRE STAECHELIN (Spanish Beauty)**—This superb Rose is now being called the best pink climbing Rose yet introduced. The plant is extremely vigorous, growing twelve feet or more. Being a true climber, it may be used for fences, pergolas, and pillars. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is deep rosy-red, the tips of the petals tinged with scarlet.

**ROSERIE (Pink Tausendschoen)**—This is a bright pink form of Tausendschoen. A grand Rose from any standpoint.

**SHOWER OF GOLD (H. W.)**—The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

**SILVER MOON (H. W.)**—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

**VEILCHENBLAU, THE BLUE ROSE (H. W.)**—This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

**WHITE DOROTHY PERKINS (W.)**—White Dorothy Perkins, in every way is the equal, if not superior, to Crimson Rambler, as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.

This climbing genus has been taken up by the florists' trade in a large way, since this plant adapts itself unusually well to the unnatural conditions of the average home better than most any other plant. A very large demand has ensued from the public. It is particularly suitable for sun parlor decoration, but does equally well in any part of the house, even in comparatively dark situations. Can be grown successfully in pots or hanging baskets, but seems particularly "happy" in wall pockets. Florists have found an unusually large demand for this valuable trailing vine and it can be merchandised with the assurance of giving utmost satisfaction with a minimum of care. # New Oriental Poppies

**NO** flower can draw more instant attention and leave a more lasting and pleasing impression than a bed of carefully selected Oriental Poppies. Either singly, or in mass, they give a touch of barbaric splendor offered by no other flower. For five years we have been carefully selecting new and better varieties which show superior merit and advancement over older types. For the first time, we are in position to offer in quantity a selected list of new varieties, each one of which is distinctly superior.

Lulu A. Neeley

**LULA A. NEELEY**—This variety is our favorite. Good strong stems support flowers of brilliant oxblood red, the color holding until the last. We predict that this variety will become the most popular Poppy in America within a few years. **\$1.50 per 12, \$10.00 per 100.**

**MRS. PERRY**—Although this Poppy has been on the market for several years, it is not widely distributed. A bright clear pink color combined with vigorous growth makes Mrs. Perry one of the most beautiful varieties. **\$1.20 per 12, \$8.00 per 100.**

**ORANGE QUEEN**—We offer a selected type of this popular orange variety. Vigorous in growth and very early. **85c per 12, \$6.00 per 100.**

**PROSPERINE**—Of the scarlets, Prosperpine, with its striking buds, heavy stems and massive flowers, is undoubtedly the best. You cannot be without this brilliant variety. **\$1.20 per 12, \$8.00 per 100.**

**TRILBY**—Enormous flowers of cerise scarlet. Very scarce and among the leaders. **\$1.50 per 12, \$10.00 per 100.**

**EDNA PERRY**—Very large, flowers of bright rose pink. One of the best. **\$1.50 per 12, \$10.00 per 100.**

**WURTEMBERGIA**—A striking flower of great size and substance. Brilliant scarlet in color. **\$1.50 per 12, \$10.00 per 100.**

# FERNS

Altho we have been increasing our production of Nephrolepis Ferns for the past four years, the demand constantly exceeds the supply. Successful fern growing invariably hinges on the cleanliness of the plants. Ours are free from "White Scale." We carry at all times a good suply of 2 1/4 inch ferns.

## Nephrolepis Varieties

	Per 12	Per 100	Per 1000
2 1/4 inch pots-----	\$ .85	\$ 5.50	\$ 50.00
3 inch pots-----	1.75	12.00	
4 inch pots-----	2.75	20.00	

**TEDDY JUNIOR** (The Fern for Every Household)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

**JOHN WANAMAKER** ("The Wanamaker Boston Fern")—A "sport" from Nephrolepis Scholzei, with longer, narrower gracefully drooping fronds. It is not so compact in growth as Scholzei, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of frods, and is quite distinct from any other Nephrolepis.

**ROOSEVELT**—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

**WHITMANII** (The Ostrich Plume Fern)—The well-known fluffy leaved fern; a popular florists' variety.

**WHITMANII COMPACTA** ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

**SCHOLZELI** ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful arch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

**BOSTONIENSIS** ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

**DWARF BOSTON**—The most popular of present day ferns. A dwarf type of the popular Boston variety.

**GOODI** ("The Baby's Breath Fern")—(Good & Reese.) This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

**SCOTTII** ("The Newport Fern")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite.

The most beautiful fern sent out in years. It has proven itself much truer to form than other ferns of this type. It is an improvement on Whitmanii, as hardy and sturdy as the Boston, a faster grower than any other fern and makes a better formed plant.

No plant lends itself to such general usefulness as the Geranium. For pot work and bedding it is unsurpassed. We carry at all times immense quantities of this indispensable florist's plant but have sold out early the past few seasons. Make your reservations early.

## New Geranium

**"Michell's Sensation"** (A cross between Ricard and Jean Viaud.) Well named, as it is really a "Sensation," and surpasses all red varieties now in existence. Below are a few of the outstanding features of this sterling novelty.

A—Very vigorous grower.

B—Free-flowering qualities, not in any other variety.

C—Handsome foliage of leathery substance. Light green with dark zone.

D—Brilliant red, Poinsettia colored. Double flower heads, expanding 5 to 6 inches across.

E—Covered continuously with flower heads, often 6 to 7 at one time.

F—Can be brought into bloom for Christmas, Easter, or Mother's Day.

	Per 12	Per 100	Per 1000
2¼-inch pots-----	\$0.90	\$6.00	\$55.00

**Irvington Beauty (New):** Since introducing this beautiful new Geranium in 1927, the demand has constantly exceeded the supply. It is most prolific of all Geraniums, flowering earlier and later than all other varieties, every branch producing an immense truss of rosy salmon pink flowers. It is not unusual for a four-inch pot plant of Irvington Beauty to show five to seven flower heads at one time. Every progressive florist should grow Irvington Beauty for increased profits.

2¼ inch pots-----	\$0.75	\$4.50	\$40.00

**Fiat—(The True Variety):** No Geranium has ever been so favorably received as Fiat. We have the true stock of Fiat, and will have the largest supply in the country this year. Florists who are not growing Fiat are missing the most brilliantly colored of all Geraniums. Of good growth, and an intense dark salmon pink in color. 2¼-inch pots, \$0.75 per doz.; \$4.50 per 100; \$40.00 per 1000.

**Alphonse Ricard:** Still the most widely used of the red varieties. For pot work and outside planting Ricard is unsurpassed. Large trusses of brilliant vermillion.

**American Beauty:** Of the same color as the famous American Beauty Rose. A very free bloomer, and excellent for forcing.

**Beaute Poitevine:** For many years Poitevine has ranked as the leading pink Geranium. In color, beautiful shrimp-pink. One of the best for pot work.

**Comtesse De Harcourt:** One of the two best white Geraniums. The large trusses of pure white flowers hold the color in excellent shape.

**Helen Michell:** The universal favorite where planted. Helen Michell cannot be surpassed in either pot work or outside planting. Enormous trusses bear brilliant scarlet flowers that do not fade in the sun.

**Jean Viaud:** One of the older favorites that is still used by many growers. The color is rich deep pink, shading to light pink near the base of the petals; the base of the upper petals being creamy white. Jean Viaud is a remarkably good Geranium.

**La Favorite:** In this Geranium we have the finest double white in cultivation. The flowers are borne in large trusses of the purest snow white, retaining this pure whiteness even in the height of summer. For winter blooming La Favorite is excellent. Your profits will increase by using this favorite.

Geranium—Irrington Beauty

**Madame Barney:** A very profuse bloomer, the individual florets being of very large size. The color is pure deep pink. Considered the perfect bedding Geranium.

**Madame Landry:** The salmon-pink Geraniums have been in constant demand for the past five years. We have never been able to grow enough of Madame Landry to supply the demand. The color is dazzling salmon-pink with a slight scarlet shading. The flower heads are large and carried on long stems.

**Marquis De Montmart:** Commonly known as the Blue Geranium. In color a rich soft purple, a very striking color. Of good growth.

**Mrs. Richard Gloede:** A very good new Geranium that is being grown more widely each year. The color is similar to American Beauty but more brilliant. Of good branching growth.

**Red Barney:** A new variety of brilliant red that is very prolific. For pot forcing it is among the leaders. Of good branching habit.

**Radio Red:** The most intense scarlet in cultivation. The color is so brilliant that it instantly commands attention. Radio Red is fast becoming the most widely used red variety. It is the best red Geranium.

**S. A. Nutt:** The darkest and richest Geranium grown. It is deep velvety maroon in color, an excellent bedder and a perfect pot plant. No other Geranium has ever equalled the richness of its coloring.

## Sweet-Scented Geraniums

**Lemon:** The foliage is pronouncedly lemon scented.

**Nutmeg:** Foliage has the true nutmeg fragrance.

**Rose:** The famous sweet rose-scented Geranium; very fragrant.

<b>Korean Chrysanthemum</b>  A remarkable new perennial of iron-clad hardiness from Korea, forming fine large clumps 2 to 3 feet in both diameter and height. The large white flowers have golden centers, resembling a glorified Ox- eye Daisy, the petals often turning to a light claret pink. <b>Sweet Wivelsfield</b>  An entirely distinct and novel hardy Dianthus known as "Sweet Wivelsfield." This new race resulted from a cross be- tween Dianthus Allwoodii and Sweet Wil- liam (D. Barbatus) made seven years ago. For two hundred years or so, crosses have been made between Carnations and Sweet Williams, and Pinks and Sweet Williams, but the resulting hybrids have been ster- ile, producing no seed and have been diffi- cult to propagate. However, this new race seeds reasonably well. Individual blos- soms are nearly three times as large as those of Sweet Williams and are borne in loose cymes. Good & Reese Giant Flowering Amaryllis

SPECIAL NOTICE

Good and Reese Amaryllis were awarded first prize at the 1931 National Flower Show in Cincinnati. We believe we have the finest Hybrid Amaryllis in America.

For the past eight years we have been selecting the best giant flowering Amaryllis from thousands of choice seedlings. These are now offered for the first time in blooming size bulbs of the most beautiful colorings. The Amaryllis is rapidly becoming more popular and it is our opinion that it will be grown by the millions before many years. It is easily grown both as a pot plant and for cutting.

GOOD'S WHITE GIANT

Only once in a decade is a really worthwhile new plant produced. In Good's White Giant, we believe we have a sensational new introduction that will become as popular as Liliu Giganteum when its merits become known. The flowers are enormous in size, often ten inches in diameter. In color, pure white without markings of any kind on the flowers. Frequently as many as six flowers are carried on a single stem. It is the most striking flower that can be grown. The stock is limited this year \$1.00 each, \$7.50 per 12, \$50.00 per 100.

GOOD & REESE GIANT HYBRIDS

These reselected hybrids are gigantic in size and exquisite in colorings. The colors range from white with thin markings of carmine, various shades of pink, to deep scarlet. Some are pure in color, others have beautiful markings and mottled throats. \$4.00 per 12, \$30.00 per 100.
